

## Feedback received, analysis and action taken report on Wipro Talent Next Training Program Academic Year 2020-21

### 1. Feedback received from Students

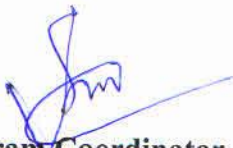

- The Project Based Learning App provided by the Wipro has a lot of issues while logging in as two-fold authentication is provided along with Google authenticator code.
- Duration of training is 200 hours in the midst of academics, and it was tough to accommodate these many hours
- To accommodate more no. of classes to complete the syllabus late evening classes were taken from 6.00PM to 8.00PM

### 2. Analysis

- The program was well taken by the participants and the positive impacts of it was observed in the process of recruitment not only in Wipro but also with other MNCs.
- The students who were poor in the programming are made to practice more coding programs and developed good programming skills.
- It was observed that the syllabus content was very comprehensive and is purely based on Project Based Learning.

### 3. Action Taken Report and Way forward

- PBL App made more easier to log-in
- It was proposed and implemented to extend the same kind of training for non-circuit branches.
- Students of non-circuit branches were given preliminary training in coding and then taught Java.
