ETHICS COMMITTEE

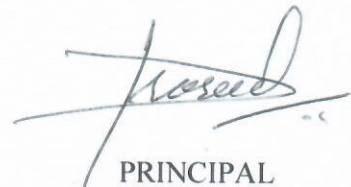

The committee sets the foundational principles and objectives that guide its functioning. It serves as an introduction to the Standard Operating Procedures (SOPs) and audit processes employed by the committee. These SOPs help ensure quality and ethics to perform with true spirit. The SOPs may cover aspects such as the submission and review process, criteria for approval, handling of conflicts of interest, and procedures for addressing non-compliance or ethical concerns. In parallel, the audit process is a systematic examination of the committee's activities and decisions to verify compliance with established SOPs and ethical standards. Together, these elements contribute to the credibility and trustworthiness of the ethics committee's role in overseeing research and academic activities.

Based on the above preambles, this organization implements a policy of ethics and values in true spirit through a structural committee consisting of the following members.

The committee shall ensure that regular audits are conducted for various processes and initiate action plan for any discrepancies.

S.No.	Members	Position
