2	<p><b><u>Curriculum and Course Titles of AR21 Academic Regulation for CSE in AIML &amp; AIDS Specializations</u></b></p> <p>Curriculum and Course Titles of the CSE-AIDS Specialization for the AR21 Academic Regulation is presented to the BoS members.</p> <p>The curriculums were approved by the members of the BoS after a thorough discussion, with the following suggestions.</p> <p>It has been confirmed that CSE-AIDS syllabus covers the subjects required for GATE-CSE examination.</p> <p>The subjects which are in lined with the CSE curriculum have already been approved by BoS members at the previous BOS meeting. The new courses introduced for CSE-AIDS are discussed for approval.</p> <p>Dr. M.H.M. Krishna Prasad, Professor/CSE at JNTUK, appreciated the incorporation of integrated courses into the curriculum. In an integrated course, students must complete both theory and lab simultaneously, allowing them to develop both theoretical and practical competencies simultaneously.</p> <p>It was suggested that during summer internships, students should engage in community service projects to</p>	

	<p>broaden their perspectives and encourage social responsibility.</p> <p>Dr. M.H.M. Krishna Prasad has made a point that the B.Tech curriculum must include a course "Universal Human Values -2" under the humanity stream with a credit value of 3, in accordance with AICTE guidelines. It is recommended that the course "Professional Ethics and Human Values," which is currently offered as an audit course, be replaced with the standard course "Universal Human Values -2."</p> <p>It is also suggested that a course with explicit tutorial hours be given extra credit to recognise the students' extra effort and time.</p> <p>It was confirmed that the "Computer Vision and Pattern Recognition" elective course in the "ML Ops" career path does not overlap with the machine learning and deep learning subjects.</p> <p>The members expressed their satisfaction with the presented curriculum and course titles and approved the AR21 Academic Regulation Curriculum and Course titles for CSE-AIML Specialization.</p>	
2.	<p><b>CSE-AIDS</b></p> <p>Neural Networks – suggested to prescribe latest edition textbooks</p> <p>Neural Networks Lab – suggested to add experiments on activation functions, Loss functions and optimization in week 4.</p> <p>-Week 11 and Week 12 experiments need to be modified.</p> <p>Data Analytics &amp; Visualization Techniques (Integrated) – Suggested to include Kafka concepts for data ingestion</p>	
3.	<p><b>Review of B.Tech Career Paths Tracks and the course titles with syllabus for AIML &amp; AIDS Specializations</b></p> <p>The subjects offered under Full Stack Developer career path have already been approved by BoS members at the previous BOS meeting.</p> <p><b>Cloud Computing:</b></p> <ol style="list-style-type: none"> <li>1) Fundamentals of Cloud Computing –suggested to include CERT-IN in unit 4</li> <li>2) Cloud Services using AWS (VI-Sem) Suggested to include SSH(secure shell) concepts in unit 1</li> <li>3) Cloud Security Essentials (VII-Sem)</li> </ol> <p>Suggested to include topics from AWS Sagemaker related to Data science and Artificial intelligence.</p> <p><b>ML Ops:</b></p> <ol style="list-style-type: none"> <li>1) Computer Vision &amp; Pattern Recognition (V-Sem)</li> <li>2) ML for Business Intelligence (VI-Sem)</li> <li>3) Conversational AI (VII-Sem)</li> </ol>	

	Proposed Courses for ML Ops are approved. The detail syllabus could be mailed for BOS members for their thorough suggestions as discussed.	
4	Fundamentals of Python Programming and its Applications (20CS408) the restructured syllabus is approved.
