

## **Criterion VII– Institutional Values and Best Practices**

### **7.1.2 (A) *Geo tagged photographs with captions of the facilities***

The GMR Solar Plant, located at GMR Nagar, Rajam, Andhra Pradesh, spans 4.435 acres and operates with an installed capacity of 700 kWp. The plant uses Canadian Solar polycrystalline 315 Wp modules, totaling 2,220 panels mounted on 222 structures. It is equipped with two inverters and Vacon combiner boxes, supported by 400 kVA and 300 kVA transformers. Commissioned in March 2016, the solar plant significantly contributes to sustainable energy generation on campus, reducing dependency on conventional power sources
