

## SDG 11.4.9

### Building on brownfield sites

GMR Sports Arena – This facility was built on the vacant lot that is part of the developed sites inside the GMRIT camps. GMRIT's Sports Arena (Fig. 1 to Fig. 5) includes indoor multifunctional courts and two Gym facilities that are used for fitness courses and employee-student recreational activities. The Gym was near the academic area but later on, was transferred to more accessible location of Sports Arena for the general public.

The newly built outdoor GMR running track is also created in front of GMR Sports Arena (Fig. 6).
