Code of Ethics for Research and Academics

To uphold the credibility of academics and research at the individual and institutional levels, the following practices are imposed for the teachers, scientists and researchers.

- All the teachers shall declare the names and tittles of the authors whose technical content is drawn either for the academics or research reference purpose
- Without checking the copy right information, the ownership for research article or research finding shall never be declared
- Plagiarism check for any kind of publications is a mandate
- The discipline of non-interference in the research works carried out by the co researchers in the laboratory, in the institution shall be maintained
- All the teachers and researchers shall declare the affiliation with the institution in all the research findings and publications
- Formal approval from the institution shall be taken to associate with any other research organization or institution in the context of all the collaborative research works
